THANKS FOR VISITING US!

CUES would like to thank all of the visitors that stopped by the booth at this year's WEFTEC show. The exhibition gave us the opportunity to showcase the latest pipeline inspection technologies for the water, wastewater, and stormwater industries. If you have any questions or feedback following the show, please email us at salesinfo@cuesinc.com. Also, feel free to browse our [website](#) to learn more about our products or call us and we will be happy to assist you. We look forward to meeting you at future events!

DID YOU KNOW?

Technology once thought to only be used for popular gaming systems is now a multi-tasker. For many years, CUES has programmed its equipment, such as the K2 portable, K2 summit and MARK3 systems, to be operated with XBOX™-like controllers. These controllers are readily available and relatively inexpensive compared to custom made controllers. Initially, these XBOX™ controllers, or similar, were only thought of and heard throughout the industry as being a "toy". But now, even the Navy is utilizing the technology. [According to a recent article](#), the Navy is now using XBOX™ controllers in lieu of expensive, clunky and heavy military joysticks to guide periscopes on their newest nuclear-powered warfare submarines. The U.S. military has been using the gaming technology for many years with other crafts and weapons, too. Since the XBOX™ controller provides a cheaper and easier way to learn the technology, training time is reduced because of the familiarity with the

controller functions. We couldn't agree more. Game on! [Visit the website](#) to learn more about CUES products.

VISIT US AT NC AWWA-WEA

Mark your calendars and make plans to visit CUES at the annual conference of the [North Carolina Section of the American Water Works Association and the North Carolina Water Environment Association \(NC AWWA-WEA\)](#) in Raleigh, NC, on November 12-15, 2017. The NC AWWA-WEA is dedicated to providing water and wastewater education, training, and service in an effort to protect public health and the environment. CUES will have exciting new innovations for the water/wastewater industry, as well as experts and top executives on hand to answer any questions you may have. Visit CUES in Booth 404. We hope to see you at the show!

CUES TIPS VIDEO - 30lb Check Valve on the Chemical Hose End

CUES has released a new CUES TIPS video! CUES TIPS videos are short, simple instructional videos or "tips" on the operation of CUES products. Click here to watch the detailed "How-to" video for the [30lb Check Valve on the Chemical Hose End](#). This video shows the easy steps to clean or repair the chemical check valve on the quad hose that connects to the grouting packer.
