

# WS112-2 STEEL WHEELS

## Carbide Toothed Wheels

The WS112-2 steel wheels are an effective alternative to our existing 8" wheels.

Reduce video vibration by more than 50%. Precisely coated with conical carbide teeth to ensure uniform placement and coverage.

Increase traction when compared to traditional carbide or rubber coatings in both PVC and clay pipes.

Maintain traction through debris and sewage. Carbide teeth maintain contact with pipe surface. Teeth spacing prevents clogging.

These steel wheels are compatible with 8" configurations of the SPRII, LAMP II, CPR, and WTR III systems.

Other sizes coming soon!
