

## Cooperative Purchasing Venture

### What is the Oakland Cooperative Purchasing Program?

Oakland County Purchasing has developed an inter-governmental Cooperative Purchasing Program for the procurement of goods and/or services. This program is at no cost to the procurement participants or the vendors. The primary participants are counties, cities, villages, and townships in the lower half of Michigan. The purpose of this program is to obtain an overall lower cost for all participants by combining volumes, increasing purchasing power, and realizing efficiencies.

### How does the Program Work?

Oakland County requires that the awarded vendor will authorize their contract availability on the cooperative program website. Once signed, vendors agree to supply the goods and/or services at the established county contract pricing to other government entities.

For specific information and membership forms please go to the following: <http://www.oakgov.com/purchasing>

## WHAT ARE THE BENEFITS OF THE OAKLAND COOPERATIVE PURCHASING PROGRAM?

Oakland County recognizes the benefits and savings that extended purchasing programs can offer to counties, cities, villages and townships. Participants may purchase products on the same terms, covenants, conditions, and pricing as Oakland County, subject to any applicable laws, regulations and ordinances of the state of purchase.

The county and the contractor understand and support that any participating agency that piggybacks onto this contract may need customer specific products and customer specific core pricing. For example, if a client has a specific need for "green or recycled" products. This agreement will allow for that participating agency to work with the contractor to load those items or any others onto a customer specific core list.

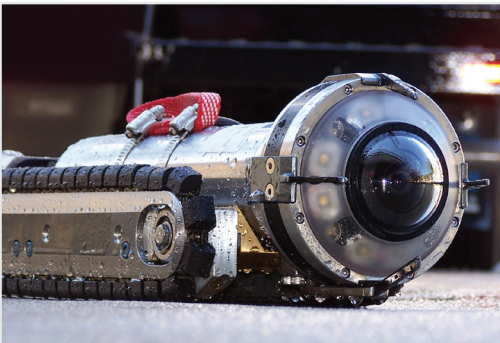

Further, it is understood that any participating agency may request to modify specific terms to meet their requirements. For example, if the contractor and the participating agency agree that the contractor will pay the agency rebates even though some invoices have been paid beyond terms, Oakland County understands and agrees to allow specific agencies to modify specific terms with the contractor.

# Cooperative Purchasing

## Features & Benefits

### What can I purchase through the program?

- Portable and Truck Mounted Pipeline TV Inspection Equipment
- Cameras
- Camera Transporters
- HD Digital Side Scanning Camera Systems
- Pipeline Data Acquisition Software & GIS Interface
- Lateral & Mainline Probes
- Lateral Reinstatement Cutters
- Laser/ Sonar Profilers
- **All CUES Products!**
