

"The Standard of the Industry"

CUES CATVS

Combined Analog TV & Sonar

TV & SONAR ***TOGETHER*** ON A SINGLE CABLE

The CUES CATVS system is a single cable TV & sonar system that transmits both video and sonar on a single multi-conductor cable. This system is designed to work with the OZII camera and the Marine Electronics Sonar using a standard CUES gold cable. It can be adapted to multiple platforms including: Sonar Float, steerable and non-steerable Pipe Ranger transporters, and the MudMaster transporter.

CUES CATVS

Features & Benefits

TV AND SONAR ***TOGETHER*** ON A SINGLE CABLE

- Perform up to 5,000' (1,524 m) inspection distances, depending on the equipment configuration.
- Double your productivity by performing both Sonar and TV inspections in one run.
- A full-size truck is no longer required to perform simultaneous TV/Sonar inspections - only one reel is required.
- Use your existing TV truck for Sonar work, too! It's quick and easy to retrofit and upgrade most trucks to CATVS. CUES' receiver only requires a single 1U rack opening in the control room for installation, since installation and the receiver is plug and play with only a few adapter cables.
- Bolt-on upgrades to your existing transporter and float make for a simple and efficient retrofit.
- Eliminate the winch and tagline to improve productivity using transporters for TV/Sonar work.
- Configurable with the CUES Base Station.
