

"The Standard of the Industry"

Welcome To CUESNews

GO THE **DISTANCE.**

Thanks for Visiting Us!

CUES would like to thank all of the visitors that stopped by the booth at this year's WEFTEC show in New Orleans! We were impressed with the number of visitors and the great interest in our products. The exhibition gave us the opportunity to showcase the latest pipeline inspection technologies for the water, wastewater, and stormwater industries. Please [browse our website](#) to learn more about our products or call us and we'd be happy to assist you. We look forward to meeting you at future events! If you have any questions or feedback following the show, [contact your CUES Regional Sales Manager](#).

After months of hard work, we are happy to officially announce the launch of our **brand new website!** The website has been completely redesigned to provide our visitors with an easier way to learn about who we are as well as the pipeline inspection products we manufacture for the water, wastewater, stormwater industries.

Visit us often as we will be constantly updating the content with new product information, industry information, company updates, news, and more! We hope you enjoy the new fresh and modern design. For any questions, suggestions, feedback or comments, please **contact CUES today!**

GraniteNet is a PACP, MACP and LACP Version 7 certified software platform for managing assets, tasks, people and equipment.

GraniteNet is the next generation condition assessment software for the water, wastewater, and stormwater industries. GraniteNet software is asset based, which enables the software to easily interface with other asset based software products such as ESRI ArcGIS Mapping systems, and asset management systems to include Cityworks, Infor Public Sector (Hansen), IBM Maximo, and others. Intuitive and easy to use, data and video can now be accessed via a web portal. Please visit www.gnet.us.com to learn more and schedule a demonstration.
