

"The Standard of the Industry"

Welcome To CUES News

GO THE **DISTANCE.**

CHECK OUT THE NEW QuickZoom III CAMERA

Introducing a new lightweight, portable, wireless digital video inspection pole camera that can be operated by one person. The new **QuickZoom III (QZIII) camera** is designed to provide cable-free safe-viewing in industrial or environmental areas with no man entry. Perform swift inspections and surveys of pipelines, wet wells, manholes, sewer treatment plants, steam generators, tanks, vessels, and other areas that are difficult to reach. QZIII can also be used to locate lateral services or to identify blockages at manholes, access ports, or other entry points without entering the line or structure. To learn more, [contact your CUES Regional Sales Manager](#).

Are You REDI For This?

CUES is proud to introduce a new pipeline inspection tool designed to significantly reduce unplanned downtime. The CUES **REDI (Remote Evaluation Diagnostic Inspection) Kit** is the first pipeline inspection troubleshooting kit available on the market today designed to help diagnose electrical issues, allowing for quicker and more accurate troubleshooting and repairs of problems while in the field. [Click here](#) to watch the video on the CUES YouTube channel or to learn more, contact your [CUES Regional Sales Manager](#).

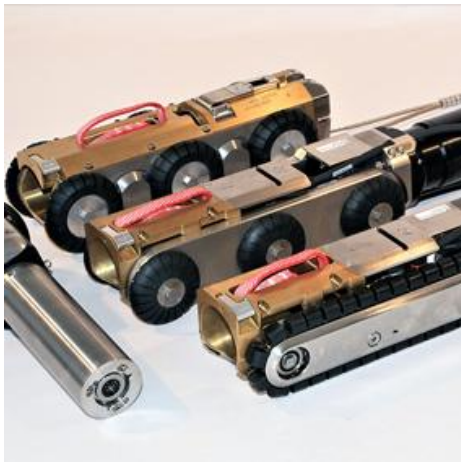

Visit CUES at the Fall FSAWWA Conference

CUES will be attending the **Florida Section of the American Water Works Association Conference** on November 25-29! Visit us at the conference to learn about CUES pipeline inspection equipment and also get comprehensive technical training/continuing education programs, high quality member services, and networking opportunities related to the water industry. We hope to see you there!

CUES SPiDER Scanner Offers Manhole Inspections at Difficult Sites

Utilities looking for a wireless color manhole inspection technology in a lightweight, compact form should consider using the **CUES SPiDER**. The SPiDER collects millions of 3D measurements during each manhole inspection, ensuring the manhole is measured to less than 5 mm accuracy. [Click here](#) to read the SPiDER Municipal Innovations article in the November Municipal Sewer and Water magazine.

QUALITY USED INVENTORY FOR SALE
