

WHY CUES?

CUES can help you GO THE **DISTANCE!**

INDUSTRY-LEADING CUSTOMER SERVICE

Customer service is our top priority. With the most dedicated sales and support teams in the industry, CUES will be there to support you through the life of your product—no matter what.

INNOVATIVE PRODUCTS DESIGNED FOR RIGOROUS FIELD-USE

With the largest R&D team in the industry, the CUES Engineering team leads the way with development of innovative products built to hold up the demands of the field. All CUES equipment is designed and built by our Engineering team and manufacturing technicians.

TECHNICAL SERVICE & PARTS ON-HAND

Equipment goes down. When it happens, the CUES team is here to help make sure you get back up and running as soon as possible. With the largest service and repair team in the industry backed by an unmatched parts inventory, CUES is able to deliver with shorter lead times, which means less downtime for you.

LOCATIONS & SUPPORT STAFF AROUND THE WORLD

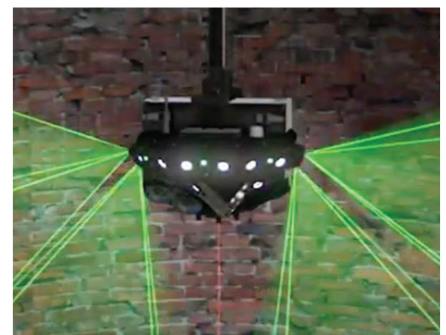

CUES has numerous locations and Regional Sales Managers throughout the U.S. and Canada committed to keeping you up and running. And, with Dealers in over 20 countries, you'll find CUES whenever you are.

NEXT-GENERATION SOFTWARE

CUES' GraniteNet is the most intuitive and easy-to-use, next-generation infrastructure inspection and asset management/decision support software for the water, wastewater, and stormwater industries.

BROADEST PRODUCT LINE AVAILABLE ON THE MARKET

From cameras, transporters, manhole inspection equipment, grouting equipment, customized vehicles, as well as sonar, lidar, and laser profiling for those requiring more detailed inspection data, CUES has the equipment to help you GO THE DISTANCE on any job, big or small.
