CUES New Product - CUES LOCK Product Line

www.cuesinc.com

May 10, 2019

Orlando, Florida, USA - CUES is proud to offer innovative no-dig sewer line solutions for efficient and reliable pipeline repair. CUES' latest GROUT/REHABILITATION product line, CUES LOCK, includes structural point repair systems designed to be used for stand-alone spot repairs or to enhance quality and simplicity of cured-in-place relining. CUES LOCK products are easy to install, require very little equipment, and most repairs can be carried out in live sewer operating conditions. Proven CUES LOCK technologies do not require digging or external point repair. CUES LOCK product line includes:

- CUES LOCK stents for a quick and easy way to bridge holes, voids, cracks and weakened/broken sections in pipes to help and allow easy installation of any type of cured-in-place pipes through the stents.
- CUES-Lock Structural & Sealer Sleeves to restore damaged areas to full structural strength and seals infiltration.
- CUES-Lock End Sealers are used to seal the annular space between the cured-in-place liner and the host pipe at the pipe ends. End Sealers prevent the ends of the cured-in-place liner from delaminating or sagging from the host pipe.

About CUES, a Subsidiary of SPX Corporation - As the world's leading manufacturer of water, wastewater, and stormwater inspection equipment, CUES provides the necessary tools for both pipeline inspection and repair. For 50+ years, CUES has manufactured the most rugged and reliable pipeline inspection equipment in the industry. CUES also offers a range of advanced systems, such as SONAR, LIDAR, and LASER PROFILING, for those requiring more detailed inspection data. For more information, visit www.cuesinc.com.
