NEW! CUES LOCK Products

BEFORE

AFTER

CUES is proud to offer innovative no-dig sewer line solutions for efficient and reliable pipeline repair. CUES' latest GROUT/REHABILITATION product line, CUES LOCK, includes structural point repair systems designed to be used for stand-alone spot repairs or to enhance quality and simplicity of cured-in-place relining. **CUES LOCK products** are easy to install, require very little equipment, and most repairs can be carried out in live sewer operating conditions. Proven CUES LOCK technologies do not require digging or external point repair. To learn more about CUES products or for a free demo, [contact your CUES Regional Sales Manager](#).

THE NEXT GENERATION
CONDITION ASSESSMENT SOFTWARE

GRANITENET SOFTWARE

GraniteNet is the next generation Condition Assessment Software for the Public Works industry. Granite Net software is asset based, which enables the software to easily interface with other asset based software products such as ESRI ArcGIS Mapping systems and asset management systems to include Cityworks, INFOR, IBM Maximo, and others. Intuitive and easy to use, data and video can now be accessed via a web portal. To learn more, visit <http://gnet.us.com/csd> or for a free demo, [contact your CUES Regional Sales Manager](#).
