CUES New Product – LARGE & SMALL CURRAHEE CUTTERS

Orlando, Florida, USA

CUES is proud to introduce the small and large Currahee Cutters. These cutters are specifically designed to reinstate wastewater service laterals, remove protruding taps, and brush-finish existing cuts. The cutters function in a range of 5.25" through 36" pipe, are equally effective in CIPP or fold and form liners, and can be installed on a CUES K2 truck-mounted cutter system or any CCTV manufacturer's truck-mounted system.

CUES also developed a new 1.9hp air motor for the small Currahee Cutter line to provide more power, increased productivity, and a smoother cut when operating in 6" - 12" relined pipe. Kits are available to retro-fit Currahee Cutters for use with Kangaroo air-motors and service kits can be purchased for regular maintenance intervals on existing motors. Contact CUES for a discussion and demonstration.

About CUES, a Subsidiary of SPX Corporation - As the world's leading manufacturer of water, wastewater, and stormwater inspection equipment, CUES provides the necessary tools for both pipeline inspection and repair. For 50+ years, CUES has manufactured the most rugged and reliable pipeline inspection equipment in the industry. CUES also offers a range of advanced systems, such as SONAR, LIDAR, and LASER PROFILING, for those requiring more detailed inspection data. For more information, visit www.cuesinc.com.
